- The Five P's of safe excavation

PRE-EXCAVATION MANAGEMENT AROUND SUBSURFACE UTILITIES

h² TRAINING COURSE

This course covers the requirements and regulatory obligations of locating and identifying subsurface utilities for **Site Managers, HSE Managers Supervisors and Leading Hands** on construction sites where excavation work is proposed to be carried out.

The course will inform participants of their legislative obligations and will introduce techniques and procedures that will enable the participant to make informed judgement before excavating around subsurface utilities.

The objectives of the course are to:

- Provide information on recent changes to workplace safety legislation
- Raise awareness of the process required to locate subsurface utilities
- Applying Australian Standard 5488 quality levels to reduce the possibility of damage and additional cost
- Provide suggested control measures to reduce the risk of damages and injury

PRICES

DBYD Member: \$259*

Non-member: \$299*

- Morning tea and lunch provided
- Certificate of Completion awarded

Prices are per person, excl. GST, minimum of 10 participants and maximum of 12
